Following the storm of the 21st of December, December and January, 2013 was a very quiet and peaceful period in the history of the Lebanese arts. Sunday, February 5, 2013 Lebanese artist Aammar Mouzan's new series of paintings is inspired by the works of Henri Matisse, Pablo Picasso and Renoir, the artists he has studied in Paris, France. The series of paintings are among the best of the paintings I have seen by Aammar in some time. Aammar's work is elegant, refined and bold. His paintings have a timelessness and energy that he expresses beautifully in his brushstrokes and lines. I am proud to include his work on these pages. About the artist: Aammar Mouzan was born in 1978 in Hasaka, Syria. He is a graduate of Arts in Culture and Art in 2013. He lives and works in Lebanon. He has had solo exhibitions in Lebanon. His work is included in the collections of the Museum of Modern Art in Montreal and the French Embassy in Beirut. Currently, he is working on some projects that include working as the spokesman for the Lebanese Initiative for Advanced Creativity (LIANA). Subscribe to this blog Follow by Email ABOUT

Sawt El-Ghad Radio Crack Registration Code Free Download

Easy Photo Movie Maker is a simple yet powerful photo to video editing program. It can support most of image file formats including JPG, JPEG, PNG, GIF, TIF, BMP, etc. And you can edit the photo effect such as resize, rotate, crop, mirror, flip,... Free for personal use only. The deep blues singer was born Albert Christopher Houston, the son of a poor tenant farmer, in Alabama in 1941. Houston grew up listening to country and rockabilly records by Elvis Presley and Hank Williams. After graduating from high school he joined the army, and in his spare time began singing in church and clubs. In 1966 he moved to Memphis and worked in a local recording studio. In 1970 he returned to Nashville and changed his name to The Rev. Albert Lee, taking the name from an old friend who had committed suicide, according to his biography. The country music singer-songwriter had a string of minor hit singles in the 1970s and 1980s, and recorded several albums,... Sawt El-Ghad started broadcasting in March 2005 on the Nile Network and through satellites and cable operators across the Arab world. The station broadcasts 24 hours a day, 7 days a week, with programs in Arabic, English and French. On top of the news, Sawt El-Ghad features shows, music, movies, sports, and events to promote the society. The current programming has a lineup including a morning show, live performance programs in English and Arabic, a magazine show, a music show and a show to talk about culture and society. Though the source for the following assertion is unknown, the co-founder of the station, Salam Ahlam, asserted that Sawt El-Ghad is "...one of the most important media channels in Lebanon. We have been pioneering in offering news in the Arab world by giving continuous updates on political, social, cultural and economic events." The station has been awarded several awards and has been highlighted in numerous local and international publications. As of August 2010, it is available in about 50 million households in the Middle East, North Africa, and the South Pacific, and about ten million households in Europe. The majority of these households receive the station's signal via satellite (Nile Network and Arabsat), although nearly 20 million households get the signal via cable. With stations in Beirut, Tripoli, Chyah and in Iran and Syria, Sawt El-Ghad represents a network of national radio stations that offers audiences a true cultural experience of the Arabic language. Visit: ----- Please subscribe to our channel: Visit Our Website: Visit Our Facebook: Visit Our Twitter: I'm giving this talk at a high school and would like to give the kids a sense of the excitement and intrigue of "real" science. I chose a real person: Dr. Glenn T. Seaborg. In the 1920s, Glenn Seaborg, an American chemist, discovered transuranium elements. He had a dream to find an "island of stability" around transuranium elements in the Periodic Table. It's an island where all the transuranium elements would be stable. This island is actually in the table. And the things we found on this island are literally breathtaking. It's the reason why we're here. When Glenn Seaborg discovered transuranium elements, he couldn't actually prove that they were stable. In 1986, over 300 scientists gathered for the 30th International Conference on Radioactivity. They confirmed that the transuranium elements were indeed stable. The questions about the nature of the transuranium elements were answered by way of neutron capture and nuclear transmutation. In order to make an element more stable, it means we need to add extra neutrons. This process is called nuclear transmutation, and this is how we make new and interesting elements. I got to know Dr. Seaborg through a wonderful book called Promethean Fire: Alchemy and the Creation of the Atomic Bomb by Robert Kaiser. In the book he recounts a story that Glenn Seaborg once told him in the 1980s. It was the 20th anniversary of the discovery of element 94. For 20 years, no one had known the true identity of element 94. But in 1986, when they officially confirmed that it was a new element called element 114, Glenn

What's New In Sawt El-Ghad Radio?

The program can play latest muzics, and news. We provide programs everyday.
